Assessment 1

DEADLINE: Friday 19th November 2021 at 3:30pm

Create a Twitter Bootstrap website using the content delivery network for scripts and utilizing best practices, implement appropriate file organization.

You are required to develop a website using the following guidelines provided:

➢ Add a row with two columns which are four columns wide each that are evenly spaced out. This layout is for screens **bigger than 1300px**.

➢ Set the background colour of the left column to a shade of blue using the hexadecimal colour format and set the background colour of the right column to a shade of green using the RGB colour format.

➢ Add the text "*HELLO*" to the left column and set its size to "DISPLAY2" and add the text "*World!*" to the right column and set its size to "DISPLAY4".

➢ Add a new row with one centered column that is five columns wide and download a 720p mp4 video clip from YouTube using a video downloader and implement it in the column. The video should auto play and show the controls.
Optional: https://en.savefrom.net/1-youtube-video-downloader-31/

➢ Add a new row with one right-aligned column that is three columns wide and add the centered text "© *copyright 2021*".

➢ Insert a new row above the row with the video and insert two paragraphs of text (You are free to use a text generator). This row should **only be visible on medium screens** and have the largest possible Bootstrap margin on the top and bottom of it.

➢ Add an image as a background for website that covers the entire viewport. This background image **should not scroll with the page**.

Upload a zipped file of your project folder where the name of the file is your ID number and –web01 e.g. **123456789-web01**. You may submit modified versions of the file up until the deadline. Only the most recent version will be marked.
